# TheFence UAR Plus
AI-Powered User Access Review

TheFence™ UAR Plus is a next-generation, AI-powered User Access Review solution that automates periodic access certifications across enterprise systems. It ensures that the right users have the right access at the right time, while reducing manual effort, audit pressure and access risk.

Designed for organizations that require frequent, risk-based access reviews without enterprise IAM complexity or consultant-driven projects.

How It Works

Collect user information → **Correlate users to identities** → **Assign identities to managers** → **Initialize UAR**

Finish UAR Ready for audit ← **Validate results** ← **Manage removals create tickets** ← **Managers review with AI recommendations**

Business Values

- **Enables** frequent, scalable access reviews
- **Offloads** IT Security, HR, risk, legal and business teams
- **Reduces** unauthorized access and insider risk
- **Identifies** unused access and unnecessary license costs
- **Provides** full transparency and traceability for audits
- **Adapts** quickly to organizational change and growth
