# THEFENCE IDM Smart

TheFence™ IDM Smart is a cost-effective and rapidly deployable **access request management solution**. It focuses on managing the user access lifecycle, accelerating the approval process, and eliminating delays in provisioning. It ensures a seamless experience for both users and approvers, offering APIs to integrate with external processes and tools.

Why TheFence IDM Smart?

Access Request Management

Streamlines the process of **requesting and granting access** to empower users while maintaining strict control over permissions. Features a user-friendly web UI to efficiently handle access requests, enhancing security and productivity.

User and Role Management

Facilitates **easy management** of user access and permissions, ensuring that the right individuals have the **appropriate level of access** while maintaining strong security.

Access Request Approval Workflow

Balances flexibility and simplicity, making it easy for organizations to manage access while **customizing the process** to meet their specific needs.

Automated User Management

The **API-first**, **lightweight cloud** architecture offers exceptional performance, **scalability**, and **flexibility**, revolutionizing how your organization handles access management.

Cost-Effective

Delivers essential identity and access management features without unnecessary complexity. Businesses **pay only for the functionality they need**, avoiding the costs associated with more complex systems.

Audit Trails & Compliance Reports

This **NIS2-compliant** Identity and Access Management solution provides comprehensive audit trails and out-of-the-box **compliance reports**, ensuring your organization remains secure and audit-ready.

Rapid Deployment & Integration

Designed for **quick setup** and **smooth integration**, ensuring your organization can be operational with minimal disruption.

SaaS

Despite being a Software as a Service (SaaS) platform, it supports **hybrid** IT environments through TheFence Agent technology, enabling businesses to manage both **cloud and on-premise systems** with a single solution, thus eliminating the need for multiple, expensive tools.

From SMEs to Enterpise

TheFence IDM Smart is tailored for organizations of all sizes that require optimum usability and strong security without the complexity of the resource intensive enterprise-grade systems.
